CHAPTER 4

THE CUBAN MISSILE CRISIS

‘Within the past week unmistakable evidence has established the fact that a series of offensive missile sites is now in preparation on [Cuba]. The purposes of these bases can be none other than to provide a nuclear strike capacity against the Western hemisphere ... It shall be the policy of this nation to regard any nuclear missile launched from Cuba against any nation in the Western hemisphere as an attack by the Soviet Union on the United States, requiring a full retaliatory response upon the Soviet Union.’

PRESIDENT JOHN F. KENNEDY, 22 OCTOBER 1962

INTRODUCTION

On 1 January 1959, left-wing rebels under the leadership of Fidel Castro seized control of Cuba. As Castro’s ideology and policies veered towards socialism, Castro drew the ire of the United States. Embargo, invasion and assassination attempts followed. Castro was forced to seek economic and military security from another world power: the Soviet Union. Soviet Premier Khrushchev decided to install nuclear missiles on Cuba to intimidate the United States. This was the catalyst for the Cuban Missile Crisis.

The Cuban Missile Crisis was an escalation in the tensions between the two superpowers, which one historian called the ‘most dangerous crisis of the Cold War.’ Only by standing on the edge of the abyss could the USA and USSR see that their rivalry had taken humanity to the brink of extinction. A period of détente followed, which saw greater communication between the two superpowers, and a tentative step towards placing limits on the most dangerous weapon mankind has ever devised.
OVERVIEW

SECTION A: COMPETING IDEOLOGIES

CENTURY 2: POST-WAR CHALLENGES

KEY QUESTIONS

- When did Castro come to power in Cuba?
- Why did the United States put economic pressure on the Castro regime?
- When did Castro adopt socialism and request military support from the Soviet Union?
- Why did the Soviet Union deploy nuclear missiles in Cuba, and how did the United States respond?
- How did the stand-off over the missiles almost lead to World War III?
- How was the Crisis resolved?

KEY EVENTS

1945
- 16 JULY: US detonates first atomic bomb
- 6 & 9 AUGUST: Nuclear bombs dropped on Japan

1949
- 1 JANUARY: The strategic arms race begins

1959
- 13 AUGUST: Khrushchev orders the construction of the Berlin Wall

1961
- 29 AUGUST: USER detonates its first atomic bomb
- 17-19 APRIL: The Bay of Pigs invasion
- 13 AUGUST: Khrushchev orders the construction of the Berlin Wall

1962
- 16-28 OCTOBER: The thirteen days of the Cuban Missile Crisis

1963
- 5 AUGUST: The Limited Nuclear Test Ban Treaty signed
- 22 NOVEMBER: JFK is assassinated

1969
- 1 JANUARY: The Vienna Conference and the Berlin Wall

COLD WAR TENSIONS BETWEEN THE USA AND THE USSR

THE CUBAN REVOLUTION (1 JANUARY 1959)

THE BAY OF PIGS INVASION (APRIL 1961)

THE THIRTEEN DAYS OF THE CUBAN MISSILE CRISIS (OCTOBER 1962)

DETENTE: AN AGREEMENT BETWEEN THE US AND USSR

KEY PLAYERS

FIDEL CASTRO
- Leader of Cuba during the Crisis
- Born in 1926; became involved in radical student politics while studying law at university
- Jailed after leading a raid on an army barracks on 22 July 1953
- Released two years later, he organised a small army to take control of Cuba. In 1959 his small group of rebels seized Havana from the corrupt Batista regime
- Castro’s left-wing policies incensed the United States and forced him to establish closer links with the Soviet Union
- Agreed to let the Russians install nuclear missiles in Cuba in 1962
- Castro continued to rule Cuba after the Crisis until poor health forced him to step down from office in 2008.

JOHN F. KENNEDY
- Kennedy—also called Jack or JFK—was president of the United States during the Crisis
- Born in 1917; served in the US Navy during World War II and then entered politics
- He won an extremely narrow election victory in 1960 to become America’s thirty-fifth president
- During his term in office he faced a number of international crises: the Bay of Pigs invasion, the construction of the Berlin Wall and the Cuban Missile Crisis
- He was assassinated on 22 November 1963 in Dallas, Texas.

NIKITA KRUSHCHEV
- Premier of the Soviet Union during the Crisis
- Pursued a policy of brinkmanship with the United States over the Cold War hotspots of West Berlin and Cuba
- Perceived as having backed down during the Crisis, Khrushchev was forced to resign in 1964
- Died of a heart attack in 1971.

HISTORICAL INQUIRY

With a partner, create eight to twelve inquiry questions under the general heading of ‘The causes and consequences of the Cuban Missile Crisis.’ Keep your inquiry questions in mind as you read the information and work through the activities in this chapter. Here are three examples to help you get started:
1. How did the US react to Castro’s policies and actions in Cuba?
2. Why did Khrushchev deploy nuclear missiles in Cuba?
3. What were the outcomes of the Crisis for the key leaders and nations involved?

KEY TERMS

EXCOMM
- Short for ‘executive committee.’ The government body set up by President Kennedy to advise him on how to respond to the deployment of Russian nuclear missiles in Cuba.

DEFCON
- Short for ‘defence condition,’ DEFCON refers to the five levels of readiness for war for US military forces. DEFCON 1 means the nation is at war. During the Cuban Missile Crisis, the US Air Force was placed at DEFCON 2.

ICBM
- Abbreviation for ‘intercontinental ballistic missile.’ A missile with a nuclear warhead that can be fired at targets on the other side of the globe.

BRINKMANSHIP
- The strategy of bringing your opponent to the point of actual conflict, such as a nuclear war, and forcing them to back down in order to gain an advantage.

DETERENCE
- The idea that a nation possesses enough weapons, and the willingness to use them, to convince other nations not to attack them.

DETENTE
- The reduction in tension between two nations, taken from the French word for ‘release’ or ‘relaxation’.

MAD
- Acronym for ‘mutual assured destruction.’ The idea that in the event of a nuclear attack, the target nation will have enough nuclear weapons remaining to destroy its opponent. This theoretically makes nuclear war impossible, as neither side can win.
THE CUBAN REVOLUTION

FIDEL CASTRO: ‘A revolution is not a bed of roses. A revolution is a struggle between the future and the past.’

TROUBLE IN THE TROPICS

Cuba had been a Spanish colony until the Spanish–American War of 1898. While Cuba technically then became an independent nation, it quickly came under the economic and political dominance of the United States. Under the Platt Amendment, the United States reserved the right to intervene in Cuban affairs, with troops if necessary, and supported several corrupt regimes. The United States also maintained a military base at Guantánamo Bay. In 1933, Colonel Fulgencio Batista overthrew the existing government and, as head of the army, effectively controlled the five-man presidential committee. Batista was President of Cuba 1940–44 and, after a long stay in the United States, seized control of Cuba in 1952 through a military coup. This occurred three months before an election Batista feared he would lose. He suspended individual liberties and favoured wealthy landowners over the poor. Batista’s regime also brutally suppressed political opponents. In a speech in October 1960, Senator John F Kennedy claimed that ‘Batista murdered 20,000 Cubans in seven years.’ Batista allowed American businesses to control the Cuban economy and reap enormous profits. He also encouraged the Mafia to establish casinos in the capital city, Havana.

While Batista had the support of a small group of wealthy businessmen and plantation owners, most Cuban people detested the corruption of his regime and by the mid-1950s resistance groups had emerged. One was led by a middle-class law student named Fidel Castro. On 26 July 1953, Castro and a group of his followers attacked an army barracks. The raid was unsuccessful and Castro was captured. After two years in prison, Castro was released and fled to Mexico. He founded a revolutionary group named after the date of the attack on the barracks—the 26th of July Movement—and started planning another attempt to overthrow the Batista regime. He returned to Cuba in 1956 with a small group of followers. Unable to defeat Batista’s forces, however, Castro fled to the Sierra Maestra mountains in the south-east of the island.
CASTRO’S LEFT TURN

Castro’s forces waited in the mountains and gathered support while Batista’s regime grew more unpopular with the Cuban people. During this time Castro was helped by the Argentinian revolutionary Ernesto ‘Che’ Guevara. Batista launched a few half-hearted attacks on Castro’s positions in May 1958 but they were unsuccessful. In fact, many of Batista’s soldiers went over to Castro’s side! By late 1958 Castro’s forces were ready to advance on Havana. Support for Batista’s regime collapsed and the dictator fled to Portugal. There was widespread support in Cuba for Castro when he took control of the country on 1 January 1959, and even some sectors of the US Government approved of the new government in Cuba.6

Initially Castro’s ideology was vague, as he had never made a clear statement on whether or not he supported Marxism. As American journalist Drew Pearson wondered at the time, ‘Where does Castro stand regarding Russia?’7 Without a doubt, Castro was a nationalist who deeply resented the United States’ influence over his country. US interests owned about 80 per cent of Cuba’s utilities (water, electricity and telephone services), 40 per cent of its sugar production and 90 per cent of its mining industry.8 Profits from these industries made US businesses very wealthy while the majority of the Cubans lived in poverty.

In spite of fears that he would nationalise all privately owned property and businesses, at first Castro only took over the US-owned and -operated telephone system. He also arrested and executed ex-officials of the Batista regime, many of whom had US supporters. Other ex-Batista officials fled to the United States, where they formed groups that resolved to return to Cuba and overthrow Castro. US President Eisenhower halted shipments of arms to Cuba and also threatened to stop purchasing Cuban sugar. This would have been a disaster for the Cuban economy, as it relied heavily on its sugar exports to the United States.

The breakdown in the US–Cuba relationship came in July 1960, when Castro demanded that Soviet oil be refined in Cuban-based, American-owned refineries. When Shell, Texaco and Esso refused, the Cuban government seized their facilities. Eisenhower retaliated by suspending the sugar quota, some 80 per cent of Cuban exports to the United States.9 The Soviet Union agreed to purchase the sugar and also, in the wake of a US trade embargo, supply all of Cuba’s fuel needs. Castro had wrested Cuba’s economy from the grasp of the United States but, as historian Donald Kagan notes, by turning to the Soviet Union ‘they had only traded one [form of] subordination for another.’10

SOURCE 4.05

Castro with supporters in the Sierra Maestra mountains. Fidel stands in the centre of the group while his brother is on the far left.

Ernesto ‘Che’ Guevara
Born in Argentina in 1928, Guevara studied medicine but became better known as a Latin American revolutionary who supported left-wing movements and uprisings all over South America. He helped Castro train his guerrilla army in the Sierra Maestra mountains and was Castro’s Minister of Industry (1961–1965). Guevara left Cuba to foment revolution in Bolivia, but was captured and killed by the Bolivian army in 1967. He is now an icon as a revolutionary and as someone who challenged the status quo. Guevara earned his nickname ‘Che’ when he and a friend rode motorcycles around South America. Argentinians were known by other Latin Americans to frequently use the word che, colloquially meaning ‘friend’ or ‘mate’, when they talk.

MISSILES TO CUBA

NIKITA KHRUSHCHEV: ‘What about putting one of our hedgehogs down the Americans’ trousers?’

Having a communist nation with close ties to the Soviet Union so close to home was an unpleasant experience for the United States. Ever since the Monroe Doctrine of 1823, Americans had considered Central and South America, including the Caribbean, to be within their exclusive sphere of influence. In his address to Congress on 2 December 1962, President James Monroe maintained that America would ‘consider any attempt on their [Europe’s] part to extend their [political or economic] system to any portion of this hemisphere as dangerous to our peace and security’. In line with this, in 1960 Eisenhower emphatically stated that the United States would not ‘permit the establishment of a regime dominated by international communism in the Western hemisphere’.

THE BAY OF PIGS

When President Kennedy was inaugurated in January 1961, he inherited a variety of schemes designed to depose Castro. Perhaps the most ambitious was a CIA plan to support an invasion of Cuba by 1400 anti–Castro Cuban exiles. Kennedy supported the idea but did not want any evidence of US involvement. On 17 April, an invasion was launched from Guatemala, which landed at the Bay of Pigs on the southern coast of Cuba. The invasion was a disaster. Kennedy withdrew US air support at the last minute and refused to let the US Navy protect the invasion with gunfire. Castro’s tanks and artillery pounded the exiles on the landing beach and easily defeated them. Of the invaders, some 114 were killed and over 1100 were taken prisoner. In December 1962, a prisoner exchange was arranged. Over 1000 prisoners were released and returned to the United States in exchange for basic necessities including food and medical supplies.

If the invasion was a catastrophe for the exiles, it was a political disaster for Kennedy. He felt personally responsible for the failure of the landing and admitted to our peace and security.’ In line with this, in 1960 Eisenhower emphatically stated that the United States would not ‘permit the establishment of a regime dominated by international communism in the Western hemisphere.

THE BAY OF PIGS INVASION

The name ‘Bay of Pigs’ might be the result of a mistranslation. In Spanish, this area is called Bahía de Cochinos. Cochinos means ‘pigs’ in Spanish, but it is also the name of a variety of fish found in waters of the bay.

Did you know? The Bay of Pigs invasion was not ‘the final episode in the eternal struggle of liberty against tyranny, anywhere on the face of the globe, including Cuba itself’. In spite of his resolve and promises of future action, Kennedy felt humiliated and reasoned that he had appeared weak and indecisive on the world stage. Eisenhower told Kennedy that ‘the failure of the Bay of Pigs will embolden the Soviets to do something that they would not otherwise do.’ Unfortunately for Kennedy, Eisenhower was right.

The Bay of Pigs invasion was not the only event in 1961 that made Kennedy seem weak and indecisive in the eyes of the Russians. At the Vienna summit in June 1961, and during the erection of the Berlin Wall in August 1961, Kennedy appeared unable or unwilling to stand up to Soviet aggression. For either or both of these historical events, research and report on the following questions:

1. What were the origins of the event?
2. Why did Kennedy appear weak and indecisive?
3. What were the consequences of the event for the leaders involved, and for relations between the USA and the USSR?

ประสงค์ในการกระทำ: ยุติการทำร้ายของCASTRO

Before the Bay of Pigs invasion and Kennedy’s presidency, the CIA hatched an array of schemes designed to either oust the Castro regime or assassinate Castro. In September 1960, the CIA met with members of the Mafia to organise a ‘hit’ on the Cuban leader. The Mafia despaired Castro as he had shut down their lucrative night clubs and casinos in Havana. When this came to nothing, the CIA concocted other schemes. One involved coating a cigar in poison (as Castro was a prolific smoker), while another suggested placing exploding seashells in locations where Castro (a keen scuba diver) was known to swim. In January 1962, Attorney-General Robert Kennedy initiated Operation Mongoose. The goal of this CIA-run scheme was to clandestinely send US agents and anti-Castro Cubans to Cuba to engage in acts of sabotage against targets like docks, crops, shipping and oil refineries. President Kennedy hoped that Operation Mongoose would eventually lead to an uprising by the Cuban people that would topple the Castro regime. In spite of a lavish budget and large numbers of agents and equipment, Operation Mongoose had achieved very little by the start of the Cuban Missile Crisis.

**A GOLDEN OPPORTUNITY**

By 1962, Cold War tensions had reached their height. The US and USSR were competing in several fields to demonstrate their dominance to the rest of the world. In a way, each success seemed to vindicate the political and economic systems of each side and ‘prove’ that their way of life was intrinsically superior. Just prior to the Cuban Missile Crisis, it appeared that the Soviet Union was winning. They appeared to be in front of the US in a number of important areas.

**SOURCE 4.09**

**SOURCE 4.10**

The U-2 flew at over 20,000 metres and could take incredibly detailed photographs.
Through this announcement, Kennedy was communicating to the world—and to the USSR specifically—that even if America were attacked first in a nuclear war, they possessed enough nuclear weapons to deliver a devastating counter-strike. This was an enormous blow to Khrushchev’s personal prestige as the leader of the socialist world. He knew that the Soviet Union did not have the resources to keep up with the United States in an arms race and it would take too long for the USSR to develop and deploy enough ICBMs to catch up. Khrushchev responded in the short term, in October 1961, by authorising the detonation of the Tsar Bomba (see Source 4.08). Despite its power, the Tsar Bomba was not a practical weapon—regardless of where it was dropped, the nuclear fallout would eventually reach the USSR. Khrushchev needed a more realistic means of establishing a balance of power with the United States. Castro’s revolution in Cuba provided Khrushchev with the perfect opportunity.

Fearing a repeat of the Bay of Pigs invasion with more direct involvement from the United States, in September 1961 Castro requested that Khrushchev send military equipment and soldiers to help defend Cuba. Khrushchev initially agreed to the request but soon decided to give Castro more than he had requested. On a state visit to Bulgaria in May 1962, Khrushchev looked across the Black Sea to Turkey where the United States had installed seventeen Jupiter missiles—each carrying a 1.4 megaton warhead—that were aimed at targets in the Soviet Union. The United States had established a precedent for using nuclear missiles to defend geographically vulnerable allies. ‘Now they would learn,’ Khrushchev wrote in his memoir, ‘just what it feels like to have enemy missiles pointed at you.’25 On 30 May 1962, Castro gratefully accepted Khrushchev’s offer.26 The stage was now set to embark upon a strategy that risked destabilising the extraordinarily delicate balance of power with the United States. Castro’s revolution in Cuba provided Khrushchev with the perfect opportunity.

**KHURSHCHEV’S MOTIVES**

It wasn’t just the presence of US nuclear missiles in Turkey that convinced Khrushchev to consider placing Soviet missiles in Cuba. A number of Khrushchev’s concerns, desires and fears intersected in mid-1962, prompting him to embark upon a strategy that risked destabilising the extraordinarily delicate relationship between the USA and the USSR.

**OPERATION ANADYR**

Defending socialism in the New World

The Soviet nuclear missiles, along with other military equipment, were shipped to Cuba under the codename ‘Operation Anadyr’. Overall, the Soviet Union sent:

- four motorised regiments, with 2500 men each
- two tank battalions equipped with new T-55 tanks
- a MiG-21 fighter squadron
- forty-two Il-28 bombers (each of which could carry six nuclear bombs with eight to twelve kiloton warheads)
- anti-aircraft guns
- 144 SA-2 anti-aircraft missile launchers
- Twelve short range ‘Luna’ missiles (with a range of forty-five kilometres and a two-kiloton warhead)
- Eighty R-11m (FKR) cruise missiles (with a twelve-kiloton warheads)
- Twenty-four R-12 missiles (a medium-range ballistic missile, or MRBM, with a range of 1600 kilometres)
- Twenty-four R-14 missiles (an intermediate-range ballistic missile, or IRBM, with a range of 3200 kilometres).

The Il-28 bomber, called ‘Beagle’ by the US military, was used against a US invasion force on the beaches. This equipment represented a serious commitment to defend Cuba from any future American invasion.27

**DISCUSSION**

Carefully review Khrushchev’s motives for placing missiles in Cuba and answer the following questions:

1. With a partner, rank Khrushchev’s motives from 1 to 7, from most likely (1) to least likely (7). Discuss your reasoning for each decision.
2. Share your thoughts with the rest of the class and compare your responses with other groups.

**ACTIVITY**

Carefully review Khrushchev’s motives for placing missiles in Cuba and answer the following questions:

1. With a partner, rank Khrushchev’s motives from 1 to 7, from most likely (1) to least likely (7). Discuss your reasoning for each decision.
2. Share your thoughts with the rest of the class and compare your responses with other groups.
DECEPTION AND DISCOVERY

NIKITA KHRUSHCHEV: 'This may end in a big war.'

Khrushchev was well aware that placing missiles in Cuba was a provocative act. He hoped—with misplaced optimism—that the United States would not notice the Soviet military build-up in Cuba. Once the missiles were in place and fully operational, Khrushchev’s plan was to announce their existence during a speech at the United Nations. Kennedy would find it extremely difficult to dislodge the missiles once they were in place—he would just have to learn to live with them, as Khrushchev was forced to live with US missiles in Turkey.

Unfortunately, from Khrushchev’s perspective, the United States was keeping a close eye on Cuba. US Intelligence sources detected the arrival of the MiGs, the II-28s and SA-2s in August 1962. The CIA suspected that the Soviets were also sending nuclear missiles to Cuba and urged Kennedy to act. President Kennedy ordered U-2 flights over Cuba to get more information. Deeply concerned by the Soviet military build-up on an island only 140 kilometres off the coast of Florida, on 13 September Kennedy sent a clear warning to the Soviet Union in a speech at a press conference:

KENNEDY’S SPEECH OF 13 SEPTEMBER 1962

Ever since communism moved into Cuba ... Soviet technical and military personnel have moved steadily onto the island in increasing numbers at the invitation of the Cuban Government. Now that movement has been increased. It is under our most careful surveillance. But I will repeat the conclusion that I reported last week: that these new shipments do not constitute a serious threat to any other part of this hemisphere ... But let me make this clear once again: If at any time the Communist buildup were to endanger or interfere with our security in any way ... or the lives of American citizens in this country, or if Cuba should ... become an offensive military base of significant capacity for the Soviet Union, then this country will do whatever must be done to protect its own security and that of its allies.

THE MISSILES DISCOVERED

On 14 October a U-2 aircraft flew over the western end of Cuba and took a series of photographs. Developed and analysed by the CIA the next day, the photos revealed the presence of two Soviet nuclear missiles. On the morning of Tuesday 16 October, the presidential advisor on national security matters, McGeorge Bundy, informed President Kennedy. President Kennedy immediately alerted his brother; Attorney-General Robert Kennedy, at 9.30 am. This meeting was kept brief, so that the public would not be alerted to a problem, but an ‘off the record’ meeting was held later that evening. Kennedy had an advantage, as Khrushchev didn’t know that the Americans knew about the missiles in Cuba. The question for Kennedy was what to do about them.

THIRTEEN DAYS

DEAN RUSK, SECRETARY OF STATE: ‘We are eyeball to eyeball and the other fellow just blinked.’

One of Kennedy’s options was to do nothing about the missiles. As Secretary of Defense McNamara noted, the missiles did not meaningfully reduce America’s lead in the nuclear missile race. However, they did double or even triple the number of Soviet warheads that could hit targets in the United States. In addition, it was estimated that approximately 80 million people would be killed within six minutes of the rockets being launched.

Several US strategic bomber and ICBM bases were also within range of the missiles in Cuba. The Soviet Union could now initiate a devastating first strike against the United States (see Source 4.15). While the United States possessed enough nuclear weapons to obliterate the Soviet Union in a counterstrike, the prospect of living under the threat of nuclear destruction was not one that Kennedy could consider. In the wake of the Bay of Pigs fiasco, the meeting with Khrushchev in Vienna (which Kennedy admitted was the ‘toughest thing in my life’) and the erection of the Berlin Wall, Kennedy felt the need to appear tough in front of the Russians. As Attorney-General Robert Kennedy noted, ‘The US could not accept what the Russians had done.’

There were also mid-term Congressional elections coming up in November, and Kennedy knew that backing down in front of the Soviets would be disastrous for the Democratic Party and for his own chances of re-election in 1964.

Almost immediately President Kennedy set up a special group called ExComm (short for ‘Executive Committee of the National Security Council’). The composition of the group changed over the
Throughout the Cold War, those in the US Government who called for an aggressive attitude when dealing with the Soviet Union were called ‘hawks’, while those who advocated diplomacy and discussion to avoid crises were called ‘doves’.

The two types of missiles stationed on Cuba ensured that almost every part of the continental United States could come under nuclear attack.

**Activity**

**Source Analysis**

1. Identify two cities in the United States that the Soviet missiles in Cuba could reach.
2. Identify two other important targets, not in the US, that the Soviet missiles could reach.
3. By referring to the map, and using your own knowledge, explain why President Kennedy felt that he had to force the Soviets to withdraw their missiles from Cuba.
4. Evaluate the extent to which this map helps you understand why Khrushchev decided to place nuclear missiles in Cuba. Refer to other ideas and information in your response.
**THE THIRTEEN DAYS**

The key events of the critical days in October

<table>
<thead>
<tr>
<th>DAY 1</th>
<th>TUESDAY 16 October</th>
</tr>
</thead>
<tbody>
<tr>
<td>Early morning: President Kennedy is informed that the Soviet Union is constructing nuclear missile bases on the island of Cuba.</td>
<td>11.45 am: ExComm meets for the first time to discuss how the US Government should respond. Kennedy concludes the meeting by stating that ‘we’re going to take out these missiles’.</td>
</tr>
<tr>
<td>6.30 pm: ExComm meets again. No decision is reached on how to respond, but a rapid air strike is the most favoured option at this stage; Robert McNamara presents the idea of a blockade.</td>
<td></td>

There were many more nuclear-tipped weapons in Cuba and the Caribbean than the US Government realised. While ExComm was aware of the ballistic missiles and Il-28 bombers, they knew nothing of the R-11m cruise missiles and the Lunas. More importantly, they had no idea that the Soviet commander in charge of all the Russian forces in Cuba, General Pilyuev, had been given permission to use these relatively small nuclear devices in the event of a US invasion. One of the cruise missiles could take out a US aircraft carrier and its support vessels. The Cubans were so powerful that, hypothetically, only ten of them would have been needed to completely destroy all the Allied forces landing on the Normandy beaches on D-Day, 6 June 1944. In addition, the four Soviet Foxtrot submarines guarding the freighter ships en route to Cuba each carried one nuclear-tipped torpedo. Like the cruise missiles, each torpedo was capable of destroying an aircraft carrier.46

As the crisis intensified and a nuclear war, starting with a US invasion of Cuba, seemed increasingly likely, Khrushchev began to wonder if he had pushed Kennedy too far. The quarantine around Cuba, Kennedy’s address to the nation on 22 October (see Source 4.18) and reports of a huge US troop deployment to Florida suggested to Khrushchev that the United States was prepared to spark a third world war.47 He now sought to resolve the matter diplomatically. Khrushchev sent two letters to President Kennedy, one on 26 October (see Source 4.19) and another the next day (see Source 4.20). In the first letter, Khrushchev promised to withdraw the Russian missiles in Cuba from return for a US guarantee that they would not attempt to invade Cuba again. However, the second letter was more demanding. Khrushchev insisted that the United States must also withdraw its nuclear missiles from Turkey. The reasoning behind Khrushchev’s harsher stance in the second letter can only be guessed at. It may have been the result of an article by journalist Walter Lippmann, which suggested that a missile trade-off was one way of ending the Crisis. Khrushchev was known to think that Lippmann’s views reflected the views of the White House. That Kennedy failed to publically reject Lippmann’s proposal might have suggested to Khrushchev that the US Government was prepared to trade. In addition, Robert Kennedy met with the Soviet Ambassador to the United States, Anatoly Dobrynin, on the night of 26 October and suggested that the United States was prepared to trade missiles in Turkey for those in Cuba.48 Khrushchev had raised the stakes of the game considerably and the Kennedys were now in an extremely awkward position. If the US offered—along with Khrushchev’s demand—to remove the missiles from Turkey was made public, it would seem as though the United States had relented under pressure while the Soviets had scored a great diplomatic triumph.
SECTION A: COMPETING IDEOLOGIES

CHAPTER 4: THE CUBAN MISSILE CRISIS

EXTRACT FROM KHRUSHCHEV’S SECOND LETTER TO KENNEDY, SATURDAY 27 OCTOBER 1962

We agree to remove those weapons from Cuba which you regard as offensive weapons. We agree to do this and to state this commitment in the United Nations. Your representatives will make a statement to the effect that the United States, on its part, bearing in mind the anxiety and concern of the Soviet state, will evacuate its analogous (equivalent) weapons from Turkey...the United States will also respect the integrity of the frontiers of Cuba, its sovereignty, (and) undertake not to invade...

EXTRACT FROM KENNEDY’S ADDRESS TO THE NATION, MONDAY 22 OCTOBER 1962

Good evening, my fellow citizens. This government, as promised, has maintained the closest surveillance of the Soviet military build-up on the island of Cuba. Within the past week unmistakable evidence has established the fact that a series of offensive missile sites is now in preparation on that imprisoned island. The purposes of these bases can be none other than to provide a nuclear strike capacity against the Western hemisphere... Our unswerving objective, therefore, must be to prevent the use of these missiles against this or any other country and to secure their withdrawal or elimination from the Western hemisphere... To halt this offensive build-up, a strict quarantine on all offensive military equipment under shipment to Cuba is being initiated... It shall be the policy of this nation to regard any nuclear missile launched from Cuba against any nation in the Western hemisphere as an attack by the Soviet Union on the United States, requiring a full retaliatory response upon the Soviet Union.

On Saturday 27 October, a U-2 spy plane on a photographic reconnaissance mission over Cuba was shot down by Soviet anti-aircraft missiles. Some members of ExComm demanded that President Kennedy respond by bombing all anti-aircraft sites on the island on Monday morning, along with other military targets such as the nuclear missiles. As the Crisis escalated, Kennedy found it harder to withstand ExComm’s demands for decisive military action. Not wanting to spark World War III, that night Kennedy called a small group of his advisors into the Oval Office to discuss their options. They decided that Robert Kennedy indicated that the United States would withdraw their missiles from Turkey after the Crisis was over—but that this had to remain strictly confidential. Dobrynin passed this message onto Khrushchev, and the Soviet government made in the second letter?

3. Using your own knowledge, explain why it would be so difficult for the United States to meet the new demands.

This hotline was not a phone line, as is often suggested in popular culture. Initially the link was between two teletype machines, and from 1966 a fax machine was used. As of 2008, a secure email connection is used when the leaders of Russia and the United States need to communicate quickly.

KEY DOCUMENTS FROM THE CRISIS

EXTRACT FROM KHRUSHCHEV’S FIRST LETTER TO KENNEDY, FRIDAY 26 OCTOBER 1962

If people do not show wisdom, then in the final analysis they will come to a clash, like blind moles, and then reciprocal extermination will begin. Let us therefore show statesmanlike wisdom. I propose... We, for our part, will declare that our ships, bound for Cuba, will not carry any kind of armaments. You would declare yourselves to be free of guilt. What demands does the Soviet Government make in the second letter?

1. According to President Kennedy, what is the purpose of the Soviet missile bases in Cuba?
2. What will be his government’s response?
3. What do you think Kennedy means when he refers to ‘a full retaliatory response’?

SOURCE ANALYSIS

1. Compare the tone used in this letter with that of the first letter. Is it different? If so, how? What would account for any difference?
2. What demands does the Soviet Government make in the second letter?
3. Using your own knowledge, explain why it would be so difficult for the United States to meet the new demands.

1. According to President Kennedy, what is the purpose of the Soviet missile bases in Cuba?
2. What will be his government’s response?
3. What do you think Kennedy means when he refers to ‘a full retaliatory response’?

ACTIVITY

On Saturday 27 October, a U-2 spy plane on a photographic reconnaissance mission over Cuba was shot down by Soviet anti-aircraft missiles. Some members of ExComm demanded that President Kennedy respond by bombing all anti-aircraft sites on the island on Monday morning, along with other military targets such as the nuclear missiles. As the Crisis escalated, Kennedy found it harder to withstand ExComm’s demands for decisive military action. Not wanting to spark World War III, that night Kennedy called a small group of his advisors into the Oval Office to discuss their options. They decided that Robert Kennedy indicated that the United States would withdraw their missiles from Turkey after the Crisis was over—but that this had to remain strictly confidential. Dobrynin passed this message onto Khrushchev, and the Soviet leader accepted the US offer the following morning. A possible nuclear war had possibly been averted by less than twenty-four hours.

President Kennedy’s offer to remove the missiles from Turkey was kept from the public for over twenty-five years. Robert Kennedy did not mention it in his own account of the Crisis. Even though the Jupiter missiles in Turkey were obsolete and scheduled for removal anyway, the Kennedys could not risk giving the impression that they had been removed under pressure from the Soviets. In his memoir, Khrushchev claimed that he had won a great victory as the Soviet Union had forced the United States to demobilize and to recognize Cuba. However, he had been forced to remove his missiles from Cuba and tacitly accept that his gamble had not paid off. While President Kennedy had been compelled to promise that Cuba would not be invaded again, he was seen as a tough yet calm leader who could defend the ‘free world’ from communist aggression.
**DÉTENTE, DISMISSAL AND DEATH**

**PRESEDENT KENNEDY:** ‘We are all mortal.’

During the Cuban Missile Crisis, humanity came closer than any other point in history to destroying itself. It forced the leaders of the US and the USSR to abandon their game of brinkmanship. They realised the importance of communicating clearly and establishing a shared agreement on peaceful coexistence. The years after the Crisis saw a significant relaxation in the tension between the two superpowers. The French word ‘détente’ is used to describe this period that lasted, largely uninterrupted, until the Soviet invasion of Afghanistan in 1979.

President Kennedy summed up the new spirit of détente in a speech he delivered during the Commencement Ceremony at the American University on 10 July 1963. Kennedy, and his speechwriters, had a gift for producing memorable lines, which is evident in this extract. 

KENNEDY’S ‘AMERICAN UNIVERSITY’ SPEECH

What kind of peace do I mean? What kind of peace do we seek? Not a Pax Americana enforced on the world by American weapons of war. Not the peace of the grave or the security of the slave. I am talking about genuine peace, the kind that enables men and nations to grow and to hope and to build a better life for their children ... Let us not be blind to our differences—but let us also direct attention to our common interests and the means by which those differences can be resolved. ... For, in the final analysis, our most basic common link is that we all inhabit this same small planet. We all breathe the same air. We all cherish our children’s future. And we are all mortal.

**OUTCOMES OF THE CRISIS**

A general period of détente between the two superpowers

A hotline was established between the Pentagon and the Kremlin

A nuclear test ban treaty was signed, which prohibited testing nuclear weapons above the ground or under water

Khrushchev withdrew nuclear missiles from Cuba

Khrushchev discouraged Castro from exporting socialism to other Latin American countries

Kennedy promised not to invade Cuba

In a secret deal, Kennedy agreed that the Jupiter missiles will be withdrawn from Turkey

**THE FATE OF LEADERS**

KENNEDY

After the events of October, Kennedy turned his mind to other pressing issues such as civil rights, the looming crisis in Vietnam and his own presidential re-election campaign. Kennedy’s full potential as a world leader, however, would never be realised. On 22 November 1963 Kennedy was in Dallas, Texas, on a political trip to shore up support in the southern states (where his civil rights bill was deeply unpopular) for his re-election campaign in 1964. He was killed by an assassin while riding in a limousine in the presidential motorcade. There has been a great deal of controversy about who killed Kennedy, and how many assassins were involved, ever since.

KHRUSHCHEV

Khrushchev remained leader of the Soviet Union until he was ousted by the Presidium (the ruling council of the Soviet Communist Party) in October 1964. His political opponents criticised the state of the economy, agriculture and education under Khrushchev’s rule. They also accused him of increasingly directing policy without input from the Presidium. The inherent weakness of Operation Anadyr—and his decision to back down in the face of US firmness during the Cuban Missile Crisis—also fatally wounded Khrushchev’s political and personal reputation. Khrushchev offered his resignation and pointed out just how much the USSR had changed under his leadership: ‘Could anyone have dreamed of telling Stalin that he didn’t suit us anymore and suggesting he retire?’ Khrushchev asked a colleague. ‘Not even a wet spot would have remained where we had been standing,’ Khrushchev lived in quiet retirement until his death from a heart attack in 1971.

CASTRO

Castro had not been part of the negotiations to remove the missiles and he felt deeply betrayed by Khrushchev’s decision. The Cuban leader also thought that they had missed the perfect opportunity to force the United States out of their military base at Guantanamo Bay. For Castro, the nuclear missiles had been placed in Cuba to defend it from another US invasion. Without a nuclear deterrent, Castro believed that his country was vulnerable. No attack materialised but the US trade embargo of Cuba continued. Castro remained President of Cuba until poor health forced him to step down in 2008. He was succeeded by his brother Raúl.
CONCLUSION

All national revolutions have repercussions beyond their own borders. Only one, however, almost resulted in the end of human civilization. Castro’s revolution in Cuba, his subsequent adoption of socialism and his appeals to the Soviet Union for economic and military assistance took place within the broader context of the Cold War. The United States was unwilling to accept that a foreign power had such influence over a nation in what America considered it to be its own backyard. Socialism now had a bridgehead in Latin America and the United States feared that Cuba would be used as a base to foment revolution in other nations in the Western hemisphere. Even worse, Cuba could be used as base for the installation of Soviet nuclear weapons that could directly threaten the security of the United States.

This is exactly what a U-2 spy plane discovered on 14 October 1962. Two days later President Kennedy was informed—and the Cuban Missile Crisis began. For thirteen days the world held its breath as the leaders of the two superpowers tested the limits of their courage. Courage during the crisis took two forms: the courage to stand firm and the courage to concede. Fortunately, the US and USSR put reason and compassion before fear and aggression. They came to an agreement at the last minute that prevented the outbreak of a third world war and ushered in a period of détente between the US and USSR during the 1960s and 70s.

CHAPTER REVIEW

The year is 1963 and you are a journalist in either the US or USSR. Your editor has tasked you with writing a feature-length article on the causes and consequences of the Crisis. Write from the perspective of a journalist from your chosen nation in a report of about 500 words.

EXAM PRACTICE

Using three to four points:
1. explain why President Kennedy reacted so swiftly and forcefully to remove the Soviet missiles from Cuba.
2. critically analyse how Kennedy and the members of ExComm dealt with the problem of Soviet missiles in Cuba.
3. explain how the outcomes of the Cuban Missile Crisis contributed to the general climate of détente that existed between the US and USSR during the 1960s and 70s.

ESSAY

Write an essay on one of the topics below, using evidence.

- Historian Donald Kagan argues that Kennedy’s inability to demonstrate America’s strength during the early 1960s encouraged Khrushchev to place nuclear missiles in Cuba. To what extent do you agree with this argument? Use evidence to support your answer.
- Historian John Lewis Gaddis argues that the reason behind Khrushchev’s decision to place nuclear missiles in Cuba was to extend socialism throughout Latin America. To what extent do you agree with this argument? Use evidence to support your answer.
- ‘Kennedy only made the risky decision to force the Russian missiles out of Cuba in an effort to protect his own political reputation in the United States.’ Do you think this is a fair assessment of Kennedy’s actions during the Crisis? Use evidence to support your answer.

FURTHER READING

  This brilliant documentary focuses on the life of Robert McNamara, a man who, as US Secretary of Defense, was at the heart of the Cold War for seven years. His comments and revelations carry the weight of someone who was a key participant in the Cuban Missile Crisis.
  This gripping film tells the story of the Cuban Missile Crisis from the perspective of the White House. While it goes to great lengths to get the ‘look and feel’ of the early 1960s right, it does sacrifice some historical accuracy for the purposes of drama and entertainment.
- Aleksandr Fursenko and Timothy Naftali, One Hell of a Gamble: The Secret History of the Cuban Missile Crisis, New York, 1997
  These two authors had access to never-before-seen Soviet and Cuban documents. This makes their book one of the most original and insightful on the topic, particularly when covering events in Moscow and Havana.
  One long chapter in this fascinating book is dedicated to the Cuban Missile Crisis. Kagan argues that wars break out when powerful nations are unwilling to stand up to aggression and provocations.
  A must-read for anyone learning about the Crisis. While we now know more about these events than Robert Kennedy presents in his book, this is an invaluable resource written by one of the key participants. Analytical essays and key documents are also included.
  We know so much about what happened during the Crisis because President Kennedy ordered the installation of recording devices in the White House early in his presidency. The transcripts of many discussions and meetings have been edited and presented in this highly useful resource.
